

Wanzl Smart Exit

Theft deterrent system that monitors and controls customer flow in the self-checkout area of a store.

- Used with different Wanzl ExitGates as alternative for Receipt Scanning in Self-Checkout areas
- For retailers with self-service POS systems
- System controls customer flow in the self-checkout area by detecting customers who bypass POS
- Gate opens automatically for “authorized” customers providing a convenient and frictionless shopping experience
- The Exit Gate then remains closed for Non-“authorized” customers
- Store associates have the ability to manually open the system for controlled customer and employee flow
- Stereoscopic 3D sensor monitors time spent at the self-checkout machine
- Privacy protection: Each customer is recognized as an ID, no visual detection
