

wanzl connect™ - Cart Storage Monitoring

Automate staff deployment for cart collections.

- Cloud-based system to connect and monitor Wanzl devices and provide transparency of store processes
- Real time fill level monitoring at cart storage for live inventory data
- Increase cart availability on a store level or at the store front
- Automate staff deployment for shopping cart collections, when critical fill level is reached
- No manual monitoring required with wanzl connect Recommendation Tool
- Receive notifications and task alerts when action is required
- Utilize technology only where needed, for instance at the cart storage with highest customer frequency
- Data export or direct access to your wanzl connect dashboard via web-application
- Privacy Protection: Only cart IDs get detected at cart storage
